

Cobots: The Cure for Your Staffing Headaches?

Is the struggle to fill factory jobs giving you a headache? Cobots offer an immediate cure – and can help keep your business healthy for years to come.

Does this sound familiar?

- On any given day, **25%** of my temporary workers **don't show up**.
- Even when workers show up, many **disappear at lunch time**.
- **Production errors** by temporary workers are costing me.
- Hiring production operators is a **constantly revolving door**.
- **Poor quality work** is giving my company a bad name.

Staffing Headache	Cobot Cure
Rising wages and benefit costs	Cobots are affordable Low upfront costs for a cobot and end-effector can be as little as a single worker's annual salary. Many cobots pay for themselves within months, offering long-term relief from rising costs.
Training expenses, especially with high turnover	Cobots are fast and easy to program For most basic automation tasks, cobots can be up and running within hours. Intuitive teach pendant makes "training" the robot quick and easy, even with no previous robotic or programming experience. Programs can even be stored to immediately resume previous jobs.
No-shows	You can count on cobots Cobots are always ready to work, around the clock, with no breaks, doing the jobs human workers don't want. Cobots require minimal maintenance and they keep on working long after they've paid for themselves.
Lack of motivation and poor-quality work	Cobots are accurate and consistent Cobots' consistent, accurate operation improves product quality and reduces scrap. Cobots work at about the same speed as humans, but output often increases because cobots can work around the clock without breaks.
Repetitive stress and injuries	Cobots love the 3Ds Put cobots to work on your dirty, dull, and dangerous jobs (the 3Ds). They don't need ergonomic work stations or breaks. And built-in safety features keep human workers safe.
Around-the-clock shifts	Cobots don't mind working all night Even though cobots are designed for collaborative work, they can also be used for many lights-out manufacturing processes, so that new lines are ready to go when employees arrive in the morning.
Keeping valuable employees motivated	Cobots offer a path to the future Cobots are an easy, cost-effective way to help valued employees learn new automation skills. With cobots doing the dirty work, full-time employees can be moved into more important roles to keep your business growing.
